Alco-Sensor FST®
Basic Operation Checklist
1. Attach Mouthpiece
   Insert closed end of mouthpiece into end of channel, single hole facing up. Lever/lift down to lock into place.
2. Power Instrument ON
   Press the ON button (large button) with trigger/index button to power the unit ON. Hold down for several seconds if locking is preferred.
3. Battery condition and temperature will display.
   If Option 'i' appears, instruct subject on how to properly provide a breath sample.
   Take a deep breath, hold for a moment and blow steadily into the mouthpiece for as long as you can.
4. When 'i' appears, instruct subject on how to properly provide a breath sample.
   Take a deep breath, hold for a moment and blow steadily into the mouthpiece for as long as you can.
5. Note the subject's result.
6. Remove & discard the mouthpiece.
7. Turn the instrument OFF.
   Press the OFF button (small button under display) or the instrument will auto-power down after fifteen seconds.
